Permanent Resident

EDUCATION

Purdue University

Bachelor of Science in Computer Engineering, Conc. in AI/ML

West Lafayette, IN

Aug. 2023 – May 2027

EXPERIENCE

Outside Source

Software Engineer Intern

May 2026 – Aug. 2026

Indianapolis, IN

- Built an 11-agent LLM system routing 350+ tasks through a human-gated approval queue.
- Ran 20-case concurrency and context-probe evals that overturned the team's model of agent behavior.
- Authored 8 versioned agent specs; modeled unit economics to halve projected inference spend.

GE Appliances

Software Engineer Co-op

Jan. 2025 – Aug. 2025

Louisville, KY

- Shipped an app-layer PAC compatibility fix in SmarthQ Home (1M+ installs), avoiding a firmware release.
- Rewrote 5 production screens of SmarthQ Service in Flutter, Riverpod, and Sembast.
- Built a Flutter board-config feature for the Service simulator; atomic header refactor cut DB calls 92%.
- Shipped 20+ tickets (2 features, 18 bug fixes) spanning Flutter, C#, Kotlin/Java; added legacy C# unit tests.

ACE IoT Solutions

Software Engineer Intern

May 2024 – Aug. 2024

Remote

- Built a Vue.js admin dashboard for ACE clients to view and edit IoT event data in an editable tabular interface.

Purdue University, EPICS

Project Manager & Software Lead

Aug. 2024 – Dec. 2025

West Lafayette, IN

- Led 14-dev team on a React/React Native web + mobile platform for LTHC, a housing org serving 1600+ people.
- Solo-built Fuse.js fuzzy resource-name search, easing typing and vision barriers for end users.

PROJECTS

Destination Zero - Agentic AI Dashboard | *Python, React, OpenRouter, LangGraph*

Mar. 2026

- Architected a multi-agent LangGraph pipeline with OpenRouter LLM integration.
- Integrated Model Context Protocol to provide agents with structured tool access during analysis runs.
- Implemented Firestore checkpointing for agent state and SSE streaming for real-time analysis progress.
- Built a FastAPI backend with Firebase Auth and Firestore to support RBAC proposal workflows.

Prova - AI Introspection App | *React Native, Firebase, Claude API*

Feb. 2026 - Present

- Architected and shipped a solo app (20 screens) in React Native + Expo with Firebase and Anthropic Claude.
- Engineered a 3-stage pipeline (dialog → JSON → card metadata) with a hand-tuned 13KB system prompt.
- Built authenticated REST API on Firebase Functions v2 with Bearer-token auth, replacing flaky Callable SDK.
- Designed a 4-phase session state machine with Firestore-gated bootstrap to fix a real-time-sync race condition.

AI Speech Coach | *Python, Whisper, FastAPI*

Apr. 2025

- Developed a full-stack AI web app using Next.js, Tailwind CSS, and FastAPI
- Enabled users to upload or record speech and receive real-time feedback on tone, pace, and filler words.
- Integrated Whisper for speech-to-text and sentiment analysis pipeline for actionable feedback.

TECHNICAL SKILLS

Languages: Java, Python, TypeScript, JavaScript, Dart, C++, C#, Kotlin

Frameworks: React, React Native, Expo, Next.js, FastAPI, Flutter, Node.js, LangGraph
