Permanent Resident

EDUCATION

Purdue University

Bachelor of Science in Computer Engineering, Conc. in AI/ML

West Lafayette, IN

Aug. 2023 – May 2027

EXPERIENCE

GE Appliances

Software Engineer Co-op

Jan. 2025 – Aug. 2025

Louisville, KY

- Implemented diagnostic message handling (eg: board Discover ff 01) for appliance simulators.
- Parsed and exposed ERD data to enable Rev3 Diagnostics integration within the SmartHQ Service app.
- Built board-configuration UI and linked it to simulator backend via Flutter + Riverpod + Sembast.
- Refactored legacy code for reliability and ensured cross-version compatibility with older PAC firmware.
- Developed embedded diagnostic systems software enabling cross-version compatibility for PAC units.
- Reduced DB calls by 92% by drafting and implementing efficient datamodels to minimize inconsistencies.

ACE IoT Solutions

Software Engineer Intern

May 2024 – Aug. 2024

Remote

- Built event-management portal for tracking client IoT events with Vue.js frontend and Python APIs.
- Improved UI responsiveness and simplified component logic through modular design patterns.
- Utilized Vue.js and integrated the frontend components with backend functionality.

Purdue University, EPICS

Project Manager & Software Lead

Aug. 2024 – Dec. 2025

West Lafayette, IN

- Developed a website and app using React and MUI to aid 1600+ homeless people with resources.
- Coordinated design reviews, stakeholder meetings, and deployment pipeline for feature delivery.
- Used Google Firebase to store resource information that LTHC admins can add/edit through a UI.
- Mentored teammates in Git workflows and agile planning to streamline development cycles.
- Emphasized the importance of user-friendliness and accessibility in UI design.

Purdue University, EPICS

Software Engineer & Financial Officer

Aug. 2023 – May 2024

West Lafayette, IN

- Developed a mobile app for the National Kidney Foundation to help people with chronic kidney disease.
- Aimed to help CKD patients track their daily intake, nutrients, and calories.
- Utilized Flutter to build the app, connecting with Google Firebase to ensure flawless backend features.

PROJECTS

Destination Zero - Agentic AI Dashboard | Python, React, OpenRouter, LangGraph

Mar. 2026

- Architected a multi-agent LangGraph pipeline with OpenRouter LLM integration.
- Integrated Model Context Protocol to provide agents with structured tool access during analysis runs.
- Implemented Firestore checkpointing for agent state and SSE streaming for real-time analysis progress.
- Built a FastAPI backend with Firebase Auth and Firestore to support RBAC proposal workflows.

AI Speech Coach | Python, Whisper, FastAPI

Apr. 2025

- Developed a full-stack AI web app using Next.js, Tailwind CSS, and FastAPI
- Enabled users to upload or record speech and receive real-time feedback on tone, pace, and filler words.
- Integrated Whisper for speech-to-text and sentiment analysis pipeline for actionable feedback.

TECHNICAL SKILLS

Languages: Java, Python, Dart, C++, C#, MATLAB, JavaScript, Kotlin

Frameworks: React, Node.js, Flask, WordPress, Material-UI, FastAPI, Flutter

Developer Tools: Cursor, Git, Docker, Google Cloud Platform, VS Code, PyCharm, Eclipse
